Products, Services & Solutions — Depended on Since 1955

PRODUCTS, SERVICES & SOLUTIONS

QUALITY HYDRAULIC, PNEUMATIC, MEASUREMENT, INSTRUMENTATION & CONTROL PRODUCTS

Since its inception in 1955, the Stanley M. Proctor Company has specialized in the distribution of quality hydraulic, pneumatic, measurement, instrumentation and control products. But that's not all. We also provide repair services for many of the products we sell, as well as design and build custom power units, test benches, panels and assemblies. There is no job too big or too small. Looking at our customer base today, our customers range in size from Fortune 100 to small family-owned businesses.

EXTENSIVE TECHNICAL EXPERTISE

Our technical experts find solutions to customers' needs, including system design, troubleshooting and selection of the right products.

Since 1947 Allenair has offered superb quality, reliable air and hydraulic cylinders. The standard Allenair product line is made from precision honed stainless or brass tubing with cylinder heads retained by snap rings. Our ALL STAINLESS STEEL cylinders are available in snap ring or threaded construction, which are designed to exceed the strict wash-down requirements of the food and process industries. Our bore sizes range from 7/8" to 5" with standard stroke lengths to 20" and special strokes to 130". All cylinders shipped from Allenair within 3 to 5 days.

Haskel combines a strong reputation for quality with unrivaled expertise in high-pressure technology to deliver the most comprehensive range of high-pressure pneumatic or hydraulic-driven liquid pumps, gas boosters, and air pressure amplifiers.

Our products are safe, reliable, compact and easy to install and control.

Pressure and Flow on Demand
